Why Study in the U.S.?

"I would like to go to the U.S. for further education because there I would get a global exposure in my chosen field. In my opinion, the quality of education provided by the best universities in the U.S. is not found anywhere else in the world."

- Pallavi, from India

Quality:

U.S. colleges are known worldwide for the quality of their facilities, resources, and faculty. Accreditation systems ensure that institutions continue to maintain these standards.

Choice:

The U.S. education system features many types of institutions, academic and social environments, entry requirements, degree programs, and subjects in which you can specialize.

Value:

A U.S. degree offers excellent value for the money. A wide range of tuition fees and living costs, plus some financial help from colleges, make study in the United States affordable for hundreds of thousands of international students each year.

Flexibility:

U.S. universities and colleges offer flexibility in choice of courses, but more importantly there is also the option for students to move from institution to another. Completing the first two years of a degree at one institution, usually a community college, and then moving to another, is very common.

"One year in the U.S. opened a new world of opportunities, which enabled me to grow personally and professionally. I chose to study in the U.S. because of the enormous opportunities that are available for people seeking personal and professional growth."

- Rustem, from Kazakhstan
